

"I feel completely lighter and have loads more confidence."

"I am wearing clothes I haven't worn in 10 years and have pride in my body again."

"Having beautiful breasts made me lose a little of the extra weight I was carrying around and EVERYONE I know says that I have blossomed and have not looked this good in years."

"Since my surgery my life has changed completely. I feel more confident, more attractive and feminine, and physically more comfortable than I have for many years."

"I now see my breasts as real assets of which I am very proud."

Breform is a surgical procedure and should be performed only by accredited Surgeons at select hospitals and clinics.

Welcome Back...

www.breform.com

Your natural breast shape
and your body confidence.

The Breast Lift Miracle

Breform is a feather soft mesh created to lift and support the breast from the inside as though you are wearing an invisible bra.

Perfectly suited to both reduction and lifting procedures the Breform lifts and shapes without the need for implants, and unlike conventional mastopexy the drooping wont come back.

It is highly unlikely that your Breform will ever require replacement or further surgery.

The expected scarring produced by standard reductive and mastopexy surgery can be greatly reduced by using the Breform, as the support offered to the breast tissue allows the scars to contract over time.

For A Permanent Solution

The Breform is created using the kind of Polyester mesh safely used in surgery for over 40 years; it is totally non allergenic and non toxic.

Once settled the result will be almost undetectable, the Breform cannot be felt under the skin and will not affect future breast screening.

Stay looking youthful for the long term with the soft, safe support of Breform
